Recommendations for Calves

At Birth

- Colostrum from the dam within 6 hrs. of birth (MOST IMPORTANT). Dramatically improves health and performance for the life of the calf.
- First Defense bolus or Calf Guard orally (optional to prevent scour problems)
- Inforce 3
- Vision CD/T
- 1cc MuSe or 2-3cc of BoSe subcutaneously (SQ)
- Castrate (banding ok at less than 2 month of age or prior to May 1st)

30-60 days of age (generally calves worked in May or June)

- Vision 7 w/Somnus
- Bovishield Gold 5
- Castrate (if not already done)
 - Flies are not a problem when cutting but can be with banding in the summer
- Deworm/Delouse

1 mo. Pre-weaning

- Vision 7 w/ Somnus
- Bovishield Gold 5
- Castrate (if not already done)
- Deworm/Delouse
- Dehorn
